**PROJECTS**

---

**DIVESHOP360****Technologies Used:** CakePHP, Angular, Node.js, MySQL, MongoDB, Bootstrap, HTML, CSS

**Description:** Developed a multi-tenant application for the diving industry to manage dive courses, trips, charters, equipment rentals, and customer bookings. The platform streamlined end-to-end operations including scheduling, payments, and reporting for dive shops.

**INTEGRATED COMMAND AND CONTROL CENTRE****Technologies Used:** CakePHP, Node.js, MySQL, MongoDB, Bootstrap, HTML, CSS

**Description:** Developed and deployed a secure, scalable web application for the Integrated Command and Control Centre (ICCC) as part of the Smart Cities initiative. The application supports real-time monitoring, analytics, and decision-making by integrating data from various urban services such as traffic, waste management, water supply, and emergency response systems.

**TANKRO SERVICES****Technologies Used:** PHP, MySQL, Bootstrap, HTML, CSS

**Description:** Designed and developed a custom CMS application tailored for managing customer enquiries and dynamic website content for TANKRO Services a leading water tank cleaning service provider operating across South India.
